

CA Communications Teams Up With Wygant To Provide Businesses With Voice/Data Recording, Quality Management, and Archiving Solutions

Partnership Gives Small to Mid-Sized Companies the Ability to Adopt Communications Technology Previously Employed by Only Large Enterprises

MINNEAPOLIS, MN – April 30, 2007 - CA Communications, a leader in business communications, announced today that it has teamed up with Wygant, a TeleDirect International company, to provide businesses with voice and data recording, quality management, and archiving solutions. The strategic partnership gives small to mid-sized companies the unique ability to adopt communications technology previously employed by only large enterprises.

Small enterprises can now take control of their business communications with Wygant's Encore Small Enterprise Recorder. Wygant's new small business recording solution is flexible, accurate, and reliable. Designed to assist small businesses with the evolving standards and regulations for recording, Encore efficiently addresses liability and order verification recording and employee training. With the optional CenterPlus component, businesses can evaluate agent performance, track strengths and weaknesses, and follow up with targeted coaching and training to deliver results.

Area businesses that deploy Encore will enjoy a number of benefits. These include open, non-proprietary architecture that uses standard file formats and databases in simple-to-use Windows® environment, 100% of calls may be recorded for evaluation purposes, user friendly screens and logical workflow makes agent training easy, and the flexible architecture offers scalability from small workgroups to large call center environments.

"We conducted a thorough analysis of call recording solutions in the marketplace and determined that

Encore was the right choice for our valuable customer base," said Marc Agar, President & CEO of CA Communications. "Not only is Wygant's engineering superb but it is also very cost-effective, compared to competitive products. The solution is practical for just about any company in any industry. For example, managers can record and store employee conversations with customers and utilize the system's technology to evaluate call quality. Understanding what's being communicated on a phone conversation can make or break any business."

"The heart and lifeblood of a company is its customer facing departments," stated David Lezak, president of Wygant. "This could be sales, customer service, shipping/receiving, and the help desk. Every interaction employees have with customers could earn a new customer, retain a current customer or, unfortunately, lose a customer—providing the very reason to employ call recording and quality management. Our solutions monitor work against a consistent set of Key Performance Indicators (KPIs), offering personalized coaching to help hone an employees skills as well as track their on-going success. We're excited about this partnership with Access Telecom and assisting their mission of increasing their customer's profitability and giving them a competitive advantage through the use of Wygant's technology."

ABOUT CA COMMUNICATIONS, INC.

CA Communications is a business resource for all of our customers'

telecommunications, computer hardware, software, service, and support needs.
